

Guarding and Patrolling System

Powered By RFID Technology

Be confident about the timely and regular attendance of your guarders in specified locations and build a firm and disciplined guarding and patrolling management system.

Features

- Equipped with LF RFID reader (134.2KHz or 125KHz)
- Storing time of attendance automatically after reading RFID tag
- Storing more than 250000 records for check-points (serial of tag along with read date and time)
- Application software with different facilities
- Programmable with C language
- Windows DLL for developing proprietary applications
- Flashlight
- Small and light
- Simple to use and efficient

Applications

- Periodic and visual visiting
- Portable attendance system
- Security inspection
- Guarding and Patrolling System
- Postal services
